Organizations are ready to adopt Linux but, until now, have been justifiably wary of doing so. Lack of vendor support and integrated network services posed worrisome obstacles to adoption.

Breaking barriers along this Linux path Sybase, Novell and HP now offer all the components necessary to meet the most demanding enterprise Linux needs.

- Just like Novell and Sybase, HP is a global enterprise Linux leader. Did you know that one out of every seven of the millions of servers sold annually by HP runs Linux? HP also pioneers on Linux with server blades, 64-bit Linux, Linux on 8-way servers, etc.
- Novell offers it's mission-critical SuSE Linux Enterprise Server. Novell combines that with a full set of mature network services, bringing you closer to the Novell promise of one Net, enabling you to extend the open platform with the comprehensive set of network services needed to enable and manage the constant interaction of people with your business systems.
  They also back this offering with their entire Novell support infrastructure.
- On top of this enterprise OS and hardware, Sybase provides a complete stack of rock solid Linux Enterprise-class solutions in the Database Management, Mobile Computing, Business Intelligence and Enterprise Integration area. Migrating your Microsoft environment to Linux never has been easier.

With this type of offering, we help you take a big step down the road toward actualizing Linux in your organization with lightening-fast performance, dramatic lower cost of ownership, and the many benefits of open technology as a result.

On June 29th, we will present the FREE "Linux in the Enterprise" event at the Kinepolis complex in Brussels. Along with a number of our premier Linux service partners, we would like to invite you and your colleages.

The Agenda looks like:

- 12.30-13:30
  Registration and welcome coffee. Network with colleagues and visit the exhibition area.
- 13:30-13:45
  Opening speech
- 13:45-14:45
  "Enterprise Linux Services" by Stephan Pauwels, System Engineer Novell BeLux.
  You will be brought up to date on the latest SuSE Linux Enterprise Server news and will be presented the internals of the Novell Nterprise Linux Services.
- 14:45-15:15
  "Enterprise-level Linux Applications" by Joop Bruggink, Senior Consultant Sybase.
  In this session you wil get a crystal clear overview of our Database Management, Mobile Computing, Business Intelligence and Enterprise Integration Linux solutions.
- 15:15-16:15
  Take a break and get to meet our Linux Partners capable of delivering top of the notch Linux services. Partners include BA, Kangaroot, Dolmen, fks, etc.
- 16:15-17:00
  Linux in action.
  Demo session co-presented by Novell & Sybase.
- 17:00-17:45
  Have a free cocktail and mingle among colleages and partners.

All attendees get a free 'Linux Enterprise' bag with a whole set of free products, whitepapers, success stories, benchmarks, etc. This is the fuel you have been waiting for to get up and running in a Linux Enterprise environment. As an extra, you also get a change to win a brand new HP Photosmart R707.

If you have any further questions, email us at belgiuminfo@sybase.com or dial +32 (0)2 716 83 11 (Belgium) or +352 250 750 352 (Luxembourg). On the www.sybase.be/linuxenterprise page you will find all the necessary details to get registered. We are already looking forward to welcome you!

Sincerely,
The Linux Enterprise Team
